Topic	Course	Description	Organization	Instructor	Duration	Start date	Time required	Language	Certificate	Link	Site
Healthcare system; Health information technology; Population Health; Care coordination; Data-analytics; Patient-centered care	HI-FIVE - Health Informatics for Innovation, Value & Enrichment (Clinical Perspective)	This course is one of three related courses in the HI-FIVE training program, which has topics on population health, care coordination and interoperability, value-based care, healthcare data analytics, and patient-centered care. Each of the three courses is designed from a different perspective based on various healthcare roles. This first course is from a clinical perspective, geared towards physicians, nurse practitioners, physician assistants, nurses, clinical executives and managers, medical assistants, and other clinical support roles. However, we encourage anyone working in healthcare, health IT, public health, and population health to participate in any of the three trainings.	Columbia University	Columbia University Experts	4 weeks	06/02/17	2-3 hours per week	English	Paid certificate	https://www.coursera.org/learn/hi-five-clinical	Coursera
Women's health; breast cancer	Introduction to Breast Cancer	In this course, you will learn about the leading cause of cancer in women worldwide – from the basic biology of the disease, to risk factors and prevention, to treatment modalities to survivorship. You will talk to leading experts, explore some of the milestone studies that have pushed this field forward, and have interactive discussions on discussion boards and social media. You'll even have an opportunity to let us know what topics you want to cover on tweets, so we can try to make the content fit your interests.	Yale University	Anees B. Chagpar	7 weeks	06/02/17		English	Paid certificate	https://www.coursera.org/learn/breast-cancer-causes-prevention	Coursera
Nursing; Healthcare demands; Rural Health; Australia's healthcare system; Patients	Introduction to Nursing in Healthcare	In this course you will learn about the Australian industry, rural health, speciality areas in the hospital sector, staffing requirements, and how individual team members contribute to a patient's experience. You will also gain valuable insight into the predicted healthcare demands for the future and how these could impact healthcare.	Open Universities Australia	Tanya Critchlow	4 weeks	13/02/17		English		https://www.open2study.com/courses/introduction-to-nursing-in-healthcare?utm_source=mooc-list	Open 2 Study
Nursing; Midwifery; Pregnancy; Childbirth	Midwifery	This course will benefit those who are interested in doing midwifery as a career choice. This course will allow you to see the scope of practice of the midwife and understand that the focus of midwifery care is the woman. If you are considering a career in midwifery or a parent-to-be, this course will give you insight into the world of the midwife, pregnancy and childbirth. You will explore the role of the midwife in working with women and their families during pregnancy, labour and birth and the time following birth when the woman is supported in her new role as a mother.	Open Universities Australia	Lyn Ebert	4 weeks	13/02/17		English		https://www.open2study.com/courses/midwifery	Open 2 Study
Nursing; Midwifery; Healthcare environments; Ethical values	Understanding NHS Values: Becoming a Nurse or Midwife	If you are thinking about becoming a registered nurse or midwife, understanding NHS values is important. On this course, you'll use a mixture of articles, interviews with academics and students to explore the NHS Values which underpin healthcare delivery.	Kings College London	Julie Bliss	2 weeks	16/01/17	2 hours per week	English	Certificate	https://www.futurelearn.com/courses/nhs-values-nursing-midwifery?utm_source=mooc-list	Futurelearn
Nursing; Disease transmission; Bacteria	Infection Prevention in Nursing Homes	Learn about the role of environment in disease transmission and how to implement standard and transmission-based precautions to prevent the spread of antibiotic resistant bacteria and other infections in your facility.	The University of North Carolina at Chapel Hill	Evelyn Cook	6 weeks	20/02/17		English	Paid certificate	https://www.coursera.org/learn/infection-prevention	Coursera
Health care information technology/system; Digital medicine; Electronic medical record;	Healthcare IT - Challenges and Opportunities	This course covers the modern application of information technology that is critical to supporting the vision and operational knowledge of the health care leaders in managing the health care organization. Additionally, this course integrates the Healthcare Information System as integral to the Quality Assurance Tracking Programs including measurement of systems inputs, processes, and outputs with special emphasis on systems outcomes research and organizational accountability to its various stakeholders, not the least of which are government regulators.	Icahn School of Medicine at Mount Sinai	Bruce Darrow; Nicholas Genes	5 weeks	27/02/17	3 hours per week	English	Paid certificate	https://www.coursera.org/learn/healthcare-it	Coursera
E-Health; Health data; Technology; Tele-health	eHealth: More than just an electronic record	This course aims to equip the global audience of health clinicians, students, managers, administrators, and researchers to reflect on the overall impact of eHealth on the integration of care. It explores the breadth of technology application, current and emerging trends, and showcases both local and international eHealth practice and research.	The University of Sydney	Tim Shaw	5 weeks	13/03/17	2-3 hours per week	English	Paid certificate	https://www.coursera.org/learn/ehealth	Coursera
Healthcare system; Health information technology; Population Health; Care coordination; Data-analytics; Patient-centered care	HI-FIVE: Health Informatics For Innovation, Value & Enrichment (Social/Peer Perspective)	This course is one of three related courses in the HI-FIVE training program, which has topics on population health, care coordination and interoperability, value-based care, healthcare data analytics, and patient-centered care. Each of the three courses is designed from a different perspective based on various healthcare roles. This second course is from a social or peer perspective, geared towards care coordinators, care case managers, social workers, community health workers, patient navigators, peer coaches, behavioral health support, and other similar roles. However, we encourage anyone working in healthcare, health IT, public health, and population health to participate in any of the three trainings. COURSES WITH FOCUS ON WIRELESS TECHNOLOGY 

Nursing; Cardiovascular system; Respiratory system; Digestive system; Nervous system; Patient care	Diploma in Clinical Nursing Skills	This course will be of great interest to anyone who wants to learn more about the clinical nursing skills needed to treat a range of diseases and disorders of the cardiovascular system, the respiratory system, the digestive system and the central nervous system.	AMEDD Center and School																	
Nursing; Patient care; Patient hygiene	Diploma in Nursing and Patient Care	This diploma course provides an overview of the skills and techniques required in areas such as advanced patient hygiene procedures, environmental health and safety awareness, the role of the nurse in diet therapy and how to ensure patient safety and comfort in the adult care setting. Advanced principles of hygiene provides the learner with an overview of the functions, methods and techniques applied in providing adult patient care with particular emphasis on the daily bath, oral hygiene and the benefits of a back massage in patient comfort.	AMEDD Center and School																	
Nursing; Transcultural nursing; Nursing management practices	Diploma in Nursing Leadership and Care Management	The essential role of the nurse as caregiver is well recognised but the modern nurse can also be a team leader and healthcare teacher. This nursing course provides an overview of the varied dimensions associated with the practical nurse as team leader within the healthcare setting. The course also provides the learner with an overview of the skills, techniques, and approaches required to effectively treat a diverse range of patients.	AMEDD Center and School																	
Women's Health; Human rights	International Women's Health and Human Rights	This course provides an overview of women's health and human rights, beginning in infancy and childhood, then moving through adolescence, reproductive years and aging. We consider economic, social, political and human rights factors, and the challenges women face in maintaining health and managing their lives in the face of societal pressures and obstacles.	Stanford University	Anne Firth Murray	12 weeks	Open

Tema	Curso	Descripción	Organización	Instructor	Duración	Fecha de inicio	Tiempo requerido	Idioma	Certificado	Enlace	Sitio Web
Salud femenina/ Salud materna/ Lactancia/ embarazo	Control Prenatal	El presente curso tiene como objetivo capacitar a los participantes en habilidades de consejería básica en lactancia materna, para apoyar a las madres y sus hijos durante este periodo de sus vidas y favorecer el buen estado de salud materno infantil.	Universidad Central de Venezuela	Dr. Jesús Velásquez; Dra. Jacqueline Panvini	4 semanas	Curso abierto		Español		http://sostelemedicinacursos.ucv.ve/cursos_descripcion.php?id=6	SOS Telemedicina
Salud femenina/ Salud materna/ Embarazo	Hemorragias en el embarazo	El objetivo de este curso es describir los elementos clínicos y de laboratorio que permitan identificar desde la consulta prenatal, las embarazadas con riesgo para desarrollar infecciones durante el embarazo y/o puerperio, así como tratar adecuadamente las que consulten servicios de atención obstétrica permitiendo que se realice la referencia oportuna o la atención adecuada que lleve a disminuir las elevadas cifras de morbi-mortalidad materna y perinatal por esta causa.	Universidad Central de Venezuela	Dra. Judith Toro Merlo	4 semanas	Curso abierto		Español		http://sostelemedicinacursos.ucv.ve/cursos_descripcion.php?id=14	SOS Telemedicina
Salud femenina/ Salud sexual/ Salud reproductiva	Infecciones en el embarazo y puerperio	El objetivo de este curso es sensibilizar a los integrantes del equipo de salud en la atención de la mujer, aplicando el concepto de salud sexual y reproductiva con enfoque de género, con particular énfasis aquellas en situación de minusvalía.	Universidad Central de Venezuela	Dra. Mireya González	4 semanas	Curso abierto		Español		http://sostelemedicinacursos.ucv.ve/cursos_descripcion.php?id=2	SOS Telemedicina
Salud femenina/ Salud Materna/ Embarazo	Nutrición y otras recomendaciones a la madre que amamanta	Este curso tiene como fin describir las principales entidades que producen hemorragias durante la gestación y puerperio, con énfasis en los criterios clínicos y paraclínicos que permitan realizar un diagnóstico oportuno y escoger la terapia adecuada.	Universidad Central de Venezuela	Dra. Judith Toro Merlo; Dr. Rafael Cortés Charry	4 semanas	Curso abierto		Español		http://sostelemedicinacursos.ucv.ve/cursos_descripcion.php?id=4	SOS Telemedicina
Salud femenina/ Salud Materna/ Lactancia/ Embarazo	Salud sexual y reproductiva	El presente curso tiene el propósito de capacitar a los participantes en habilidades de consejería básica en lactancia materna para apoyar a las madres y sus hijos durante este periodo de sus vidas y favorecer el buen estado de salud materno infantil.	Universidad Central de Venezuela	Dr. Jesús Velásquez; Dra. Jacqueline Panvini	4 semanas	Curso abierto		Español		http://sostelemedicinacursos.ucv.ve/cursos_descripcion.php?id=5	SOS Telemedicina
Salud femenina/ Salud Materna/ Embarazo	Trastornos hipertensivos del embarazo	Los trastornos hipertensivos del embarazo (THE) constituyen una de las causas más importantes de morbilidad y mortalidad materna y perinatal, tanto en los países en desarrollo como en los países desarrollados. Dentro de los THE, la preeclampsia constituye la más grave de las complicaciones hipertensivas del embarazo. El objetivo de este curso es describir los criterios clínicos y de laboratorio, necesarios para identificar y clasificar el riesgo para trastornos hipertensivos del embarazo, como una manera de disminuir las elevadas cifras de morbi-mortalidad materna y perinatal.	Universidad Central de Venezuela	Dra. Judith Toro Merlo	4 semanas	Curso abierto		Español		http://sostelemedicinacursos.ucv.ve/cursos_descripcion.php?id=11	SOS Telemedicina
Salud femenina/ Salud materna/ Salud Perinatal	Vacunas – Primer curso: Generalidades, calendarios y vacunas por vía oral	El buen estado de la salud materno fetal se puede asegurar y favorecer al contar con un personal de salud capacitado en lo relacionado con los procesos de evaluación clínica, paraclínica e interpretación de los resultados en embarazadas. A través de este curso el participante conocerá las herramientas básicas para el adecuado seguimiento y control prenatal.	Universidad Central de Venezuela	Dr. Jesús Velásquez; Dra. Jacqueline Panvini	4 semanas	Curso abierto		Español		http://sostelemedicinacursos.ucv.ve/cursos_descripcion.php?id=1	SOS Telemedicina
Salud femenina/ Anticoncepción	Vacunas Antibacterianas	La anticoncepción tiene grandes beneficios para la salud, pues con la prevención de embarazos no deseados se reduce sustancialmente la morbi-mortalidad tanto materna como infantil. Por tanto es importante facilitar el acceso a todas las mujeres, principalmente a las de los países en desarrollo a métodos modernos de anticoncepción. El objetivo de este curso es describir las características más importantes y los usos de los anticonceptivos modernos como una manera de favorecer, en el personal de salud, la realización de una consejería asertiva para la toma de decisión del método más adecuado en la usuaria.	Universidad Central de Venezuela	Dra. Judith Toro Merlo; Dr. Edgar Rodríguez Frías	4 semanas	Curso abierto		Español		http://sostelemedicinacursos.ucv.ve/cursos_descripcion.php?id=9	SOS Telemedicina

Vaccinology; Immunology; Cancer immunotherapy; Vaccine development	The Immune System: New Developments in Research - Part 1	This course will provide fundamental knowledge in immunology as well as some advanced topics from cutting-edge research results, such as cancer immunotherapy and novel vaccine development. During this course you will learn the mechanisms of the immune system and deepen your understanding of forefront immunology research and development of medical applications.	OsakaUx	Masayuki ; Shizuo Akira; Simon Sakaguchi; Tomohiro Kurosaki; Kiyoshi Takeda	5 weeks	Archived course - dates to be announced	4-6 hours per week	English		https://www.edx.org/course/immune-system-new-developments-research-osaka-ux-bio101#1	edX
Salud femenina/ Salud materna/ Salud Perinatal	Vacunas – Primer curso: Generalidades, calendarios y vacunas por vía oral	El buen estado de la salud materno fetal se puede asegurar y favorecer al contar con un personal de salud capacitado en lo relacionado con los procesos de evaluación clínica, paraclínica e interpretación de los resultados en embarazadas. A través de este curso el participante conocerá las herramientas básicas para el adecuado seguimiento y control prenatal.	Universidad Central de Venezuela	Dr. Jesús Velásquez; Dra. Jacqueline Parvini	4 semanas	Curso abierto		Español		http://sostelemedicinacursos.ucv.ve/cursos_descripcion.php?id=1	SOS Telemedicina
Salud femenina/ Anticoncepción	Vacunas Antibacterianas	La anticoncepción tiene grandes beneficios para la salud, pues con la prevención de embarazos no deseados se reduce sustancialmente la morbi-mortalidad tanto materna como infantil. Por tanto es importante facilitar el acceso a todas las mujeres, principalmente a las de los países en desarrollo a métodos modernos de anticoncepción. El objetivo de este curso es describir las características más importantes y los usos de los anticonceptivos modernos como una manera de favorecer, en el personal de salud, la realización de una consejería asertiva para la toma de decisión del método más adecuado en la usuaria.	Universidad Central de Venezuela	Dra. Judith Toro Merlo; Dr. Edgar Rodríguez Frias	4 semanas	Curso abierto		Español		http://sostelemedicinacursos.ucv.ve/cursos_descripcion.php?id=9	SOS Telemedicina
