Social Media for Health and Development

In resource-limited settings, bandwidth is increasing and internet access is becoming more widely available, especially through mobile devices. This introductory course on social media will strengthen the capacity of global health and development professionals interested in understanding basic principles of social media, using social media to disseminate global health and development information, and measuring social media activities.

Organization: Global Health Learning Center

Duration: 2 hours

Start date: On demand

Nursing and Mobile Technology

This course has been designed to provide an engaging, practical, "hands-on" curriculum for nurses to develop confidence in the use of mobile technology. It demonstrates the value and effectiveness of integrating mobile technology into nurses' daily routine, in various practice settings, as well as ways to use mobile technology to facilitate patient/client-centered learning.

Organization: Registered Nurses' Association of Ontario (RNAO)

Start date: On demand

Social Media in Healthcare: Opportunities and Challenges

Both medical professionals and patients must be able to use digital technologies in their work and communications properly. The course provides practical guidance to healthcare providers, patients and researchers. It is an essential course for anyone who is looking into the opportunities and challenges of using social media in healthcare.

Organization: Tapai Medical University

Duration: 5 weeks

Start date: 14 May 2018

Certificate available
