

List of selected online courses - January to July 2014

Dr Lilia Perez-Chavolla

Dr Veronique Ines Thouvenot

Topic	Course	Description	Organization	Instructor	Duration	Start date	Time required	Language	Certificate	Link	Site
Health / Virology	How Viruses Cause Disease	Introductory virology course that covers the interplay between viruses and their host organisms, with the goal of understanding viral diseases and their prevention.	Columbia University	Vincent Racaniello	12 weeks	09/01/2014	3-4 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/virology2">https://www.coursera.org/course/virology2</a>	Coursera
Health / medicine	Introductory Human Physiology	In this course, students learn to recognize and to apply the basic concepts that govern integrated body function (as an intact organism) in the body's nine organ systems.	Duke University	Jennifer Carbrey & Emma Jakoi	12 weeks	27/01/2014	6-8 hours of work / week	English with English and Portuguese subtitles	Verified certificate	<a href="https://www.coursera.org/course/humanphysio">https://www.coursera.org/course/humanphysio</a>	Coursera
Health / Research	Understanding Research: An Overview for Health Professionals	Participants will learn the elements of research methods and design that are essential to the translation of knowledge into clinical practice, administration/leadership, and health policy.	University of California, San Francisco	Abbey Alkon	6 weeks	27/01/2014	2-4 hours of work / week	English with English subtitles	Verified certificate	<a href="https://www.coursera.org/course/researchforhealth">https://www.coursera.org/course/researchforhealth</a>	Coursera
Health care / policy	Health for All Through Primary Health Care	This course explores why primary health care is central for achieving Health for All. It provides examples of how primary health care has been instrumental in approaching this goal in selected populations and how the principles of primary health care can guide future policies and actions.	Johns Hopkins University	Henry Perry	5 weeks	29/01/2014	3-4 hours of work / week	English with English subtitles	Verified certificate	<a href="http://www.coursera.org/course/healthforall">http://www.coursera.org/course/healthforall</a>	Coursera

Health / HCP / Education	Instructional Methods in Health Professions Education	This course provides those involved in educating members of the health professions an asynchronous, interdisciplinary, and interactive way to obtain, expand, and improve their teaching skills. These skills can then be applied within their own professional context, with a variety of learners, extending across many stages.	University of Michigan	Caren Stalburg	8 weeks	03/02/2014	6-8 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/instructmethodshpe">https://www.coursera.org/course/instructmethodshpe</a>	Coursera
eHealth / health informatics/ EHR	Interprofessional Healthcare Informatics	This course examines the implications of informatics for practice, in nursing, public health, and healthcare in general. It covers electronic health record issues and relates ethical, legislative and political issues to health informatics. Students will also explore global and future informatics issues.	University of Minnesota	Karen Monsen	10 weeks	10/02/2014	2-3 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/newwayhealthcare">https://www.coursera.org/course/newwayhealthcare</a>	Coursera
Health / medicine	Introduction to Clinical Neurology	An overview of the relevant aspects of the epidemiology, clinical presentation, basic disease mechanisms, diagnostic approaches and treatment options of the most common neurological diseases.	University of California, San Francisco	Daniel Lowenstein, Andrew Josephson, & Wade Smith	6 weeks	10/02/2014	4-6 hours of work / week	English with English subtitles	Verified certificate	<a href="https://www.coursera.org/course/clinicalneurology">https://www.coursera.org/course/clinicalneurology</a>	Coursera
Global health/ epidemics	Epidemiology: The Basic Science of Public Health	This course explores public health—both locally and globally—through the lens of epidemiology.	The University of North Carolina at Chapel Hill	Karin Yeatts & Lorraine Alexander	6 weeks	17/02/2014	2-3 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/epidemiology">https://www.coursera.org/course/epidemiology</a>	Coursera
Health / Practice / Clinical trials	Design and Interpretation of Clinical Trials	Learn the basic principles for design of randomized clinical trials and how they should be reported.	Johns Hopkins University	Janet Holbrook & Lea T. Drye	6 weeks	17/02/2014	2-3 hours of work / week	English with English subtitles	Verified certificate	<a href="https://www.coursera.org/course/clinicaltrials">https://www.coursera.org/course/clinicaltrials</a>	Coursera
Health / nutrition	Nutrition for Health Promotion and Disease Prevention	This course covers the basics of normal nutrition for optimal health outcomes and evidence-based diets for a variety of diseases.	University of California, San Francisco	Katie Ferraro	6 weeks	24/02/2014	4-6 hours of work / week	English with English subtitles	Verified certificate	<a href="https://www.coursera.org/course/nutrition">https://www.coursera.org/course/nutrition</a>	Coursera

eHealth / technology / nanosensors	Nanotechnology and Nanosensors	Learn about novel sensing tools that make use of nanotechnology to screen, detect and monitor various events in personal or professional life. Together, we will lay the groundwork for infinite innovative applications, starting from diagnosis and treatments of diseases, continuing with quality control of goods and environmental aspects, and ending with monitoring security issues.	Technion - Israel Institute of Technology	Hossam Haick	10 weeks	03/03/2014	6-10 hours per week	English with English subtitles		<a href="https://www.coursera.org/course/nanosensors">https://www.coursera.org/course/nanosensors</a>	Coursera
Global health / chronic diseases / diabetes	Diabetes - a Global Challenge	Diabetes is a growing health problem in rich and poor countries alike. With this course you will get updated on cutting-edge diabetes research including biological, genetic and clinical aspects as well as prevention and epidemiology of diabetes. All provided by high-profile scientists from one the world's leading universities in diabetes research.	University of Copenhagen	Jens Juul Holst & Signe Sørensen Torekov	7 weeks	24/03/2014	3-5 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/diabetes">https://www.coursera.org/course/diabetes</a>	Coursera
Global health / epidemics	Saving Lives Millions at a Time: Global Disease Control Policies & Programs	Public Health focuses on the health of entire populations, fighting disease on a massive scale. The course frames these specific global health initiatives in the context of the origins of International and Global Health, the research to program continuum, concluding with a review of major paradigm shifts in global health financing, technologies and leadership.	Johns Hopkins University	Alain Labrique & Karen R. Charron	7 weeks	24/03/2014	3-5 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/globaldiseasescontrol">https://www.coursera.org/course/globaldiseasescontrol</a>	Coursera

Health / toxicology/ emergency response	Poisonings in the Home and Community: Assessment and Emergency Response	This is a survey course on the principles of Clinical Toxicology. The emphasis will be pre-hospital and emergency hospital management of poisonings with a case-oriented lecture format. The topics are prioritized by prevalence of human poisoning, natural and synthetic toxins, and target organ effects.	University of California, San Francisco	Thomas Kearney	6 weeks	31/03/2014	3-4 hours of work / week	English with English subtitles	Verified certificate	<a href="https://www.coursera.org/course/poisonings">https://www.coursera.org/course/poisonings</a>	Coursera
Health/ Water treatment	Introduction to Household Water Treatment and Safe Storage	Learn about the most important water treatment methods at household level, successful implementation strategies and about assessing the impact of Household Water Treatment and Safe Storage (HWTS).	École Polytechnique Fédérale de Lausanne	Rick Johnston	5 weeks	07/04/2014	6-8 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/hwts">https://www.coursera.org/course/hwts</a>	Coursera
Health / Practice / Community change	Community Change in Public Health	This course examines the community context of the changes needed to promote the public's health.	Johns Hopkins University	William Brieger	6 weeks	21/04/2014	5-8 hours of work / week	English with English subtitles	Verified certificate	<a href="https://www.coursera.org/course/communitychange">https://www.coursera.org/course/communitychange</a>	Coursera
Global health	An Introduction to Global Health	This course will provide you with an overview of the most important health challenges facing the world today. You will gain insight into how challenges have changed over time, we will discuss the likely determinants of such changes and examine future projections. Successful international strategies and programs promoting human health will be highlighted and global health governance structures will be mapped and the role of the key actors explored.	University of Copenhagen	Flemming Konradsen, Siri Tellier, Alessandro R Demaio, Jeffrey Victor Lazarus, Dan Wolf Meyrowitsch, Peter Furu & Ib C. Bygbjerg	6 weeks	02/06/2014	4-6 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/globalhealthintro">https://www.coursera.org/course/globalhealthintro</a>	Coursera

Health care / policy / safety	The Science of Safety in Healthcare	This course will introduce the basic principles of the science of safety in healthcare. Course content will be of relevance to members of the healthcare delivery team, including nurses, as well as the healthcare consumers in the general public.	Johns Hopkins University	Cheryl Dennison Himmelfarb & Peter J. Pronovost	5 weeks	03/06/2014	2-5 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/healthcaresafety">https://www.coursera.org/course/healthcaresafety</a>	Coursera
Health / Nutrition / Physical activity	Nutrition and Physical Activity for Health	This course will provide a coherent, understandable look at the evidence on how nutrition and physical activity impact health through lower morbidity, longevity, and quality of life.	University of Pittsburgh	Amy D. Rickman & John M. Jakicic	6 weeks	16/06/2014	3-5 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/nutritionforhealth">https://www.coursera.org/course/nutritionforhealth</a>	Coursera
Health / Virology	Virology I: How Viruses Work	Introductory virology course emphasizing the common reactions that must be completed by all viruses for successful reproduction within a host cell.	Columbia University	Vincent Racaniello	11 weeks	01/08/2014	3-4 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/virology">https://www.coursera.org/course/virology</a>	Coursera
Global health	Global Health: An Interdisciplinary Overview	This course proposes an overview of current global health challenges drawing on the insights of several academic disciplines including medicine, public health, law, economics, social sciences and humanities. This interdisciplinary approach will guide the student into seven critical topics in global health.	University of Geneva	Antoine Geissbuhler, Louis Loutan, Samantha Battams, Didier Wernli, Slim Slama & Rafael Ruiz De Castaneda		Not available sessions	6- 7 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/globalhealthoverview">https://www.coursera.org/course/globalhealthoverview</a>	Coursera
Global health	An Introduction to Population Health	This MOOC is aimed at anyone wishing to understand the basics of population health. Our aim is to prompt any participant to reconsider the decisions they make about their own health or the health of others (if they are taking the course as a health professional).	University of Manchester	Aneez Esmail & Katie Reed		Not available sessions	1 - 3 hours per week	English with English subtitles		<a href="https://www.coursera.org/course/population">https://www.coursera.org/course/population</a>	Coursera

Global health / vaccines / vaccines safety	Vaccines	This course will discuss issues regarding vaccines and vaccine safety: the history, science, benefits, and risks of vaccines, together with the controversies surrounding vaccines and answers to common questions that parents have about vaccines.	University of Pennsylvania	Paul A. Offit		Not available sessions	2-3 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/vaccines">https://www.coursera.org/course/vaccines</a>	Coursera
Global health/ epidemics / AIDS	AIDS	This course will discuss HIV/AIDS in the US and around the world including its history, science, and culture as well as developments in behavioral and biomedical prevention, experimental AIDS vaccines, and clinical care issues. The course will also include a discussion of the populations that are particularly vulnerable to HIV/AIDS and a look at future challenges facing people infected and affected by the AIDS pandemic.	Emory University	Kimberley Sessions Hagen		Not available sessions	3-4 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/aids">https://www.coursera.org/course/aids</a>	Coursera
Global health/ epidemics / Infectious diseases	Epidemics - the Dynamics of Infectious Diseases	Malaria, HIV/AIDS, Influenza, Measles - we're in a constant battle against infectious diseases. This is a course about the dynamics of such diseases - how they emerge, how they spread around the globe, and how they can best be controlled.	University of Pennsylvania	Marcel Salathé, Ottar N. Bjornstad, Rachel A. Smith, Mary L. Poss, David P. Hughes, Peter Hudson, Matthew Ferrari, & Andrew Read		Not available sessions	1 - 2 hours per week	English with English subtitles		<a href="https://www.coursera.org/course/epidemics">https://www.coursera.org/course/epidemics</a>	Coursera
Health / Pharmacology	Fundamentals of Pharmacology	In this class you will learn how drugs affect the body, how they alter disease processes and how they might produce toxicity. We will discuss how new drugs are tested and developed prior to them being used for patient care. We will describe how personalization of medicine will become a common day reality in patient care.	University of Pennsylvania	Emma Anne Meagher		Not available sessions	2-6 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/pharm101">https://www.coursera.org/course/pharm101</a>	Coursera

Health / Public	Principles of Public Health	Principles of Public Health introduces the major concepts and principles of public health and the determinants of health status in communities. Emphasizes the ecological model that focuses on the linkages and relationships among multiple natural and social determinants affecting health.	University of California, Irvine	Zuzana Bic		Not available sessions	6-8 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/publichealth">https://www.coursera.org/course/publichealth</a>	Coursera
Health/ Water treatment / Global South	Water Supply and Sanitation Policy in Developing Countries	This course will examine current conditions and trends in water and sanitation services in the Global South. Within it we will take a critical look at the underlying political, economic, social, and technical reasons why almost a billion people lack access to improved water supplies and almost 2 billion still do not have improved sanitation services.	University of Manchester			Not available sessions	8-10 hours of work / week	English with English subtitles			Coursera
Medical resources	Rationing and Allocating Scarce Medical Resources	This course will explore the complex challenges of allocating scarce medical resources at both the micro and macro level. Students will learn the theories behind allocation and use modern examples to explore how society makes the difficult decisions that arise when there is not enough to go around.	University of Pennsylvania	Ezekiel J. Emanuel		Not available sessions	8-10 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/rationing">https://www.coursera.org/course/rationing</a>	Coursera
Women Health / contraception	Contraception: Choices, Culture and Consequences	Learn about the wide range of contraceptive methods, and the public health implications related to access to information and choices about reproductive health.	University of California, San Francisco	Jerusalem Makonnen		Not available sessions	3-5 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/contraception">https://www.coursera.org/course/contraception</a>	Coursera

Women Health / pregnancy / childbirth	Pregnancy and Childbirth: A Global Perspective	This course will discuss the global health implications of pregnancy and childbirth in the developing world, where millions of women and babies die from complications during pregnancy, childbirth, and the months after childbirth. Themes covered include global health, workforce management, cultural dynamics, geopolitical implications, and health promotion.	Emory University	Lynn Sibley		Not available sessions	2-4 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/pregnancychildbirth">https://www.coursera.org/course/pregnancychildbirth</a>	Coursera
Health / Microbes / Antibiotic practices	Antimicrobial Stewardship: Optimization of Antibiotic Practices	This course will offer a practical approach to prescribing antibiotic therapy and development of antimicrobial stewardship to physicians and pharmacists across all specialties and settings.	Stanford University	Stan Deresinski	Available for 104 weeks	Release Date: November 22nd, 2013 Expiration Date: November 22nd, 2015	Estimated Time to Complete: Six hours	English with English subtitles	CME Credits Offered: 6.0	<a href="https://www.coursera.org/course/antimicrobial">https://www.coursera.org/course/antimicrobial</a>	Coursera
eHealth / health informatics	Health Informatics in the Cloud	A non-technical introduction to the contemporary application of computing to healthcare delivery, public health and community-based clinical research.	Georgia Institute of Technology	Mark L. Braunstein		T.B.D.	5-7 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/healthinformatics">https://www.coursera.org/course/healthinformatics</a>	Coursera
Global health / health care/ innovation	Healthcare Innovation and Entrepreneurship	This interdisciplinary course focuses on sustainable innovation, introducing entrepreneurial students to the realities of problem identification and solution design within the complex world of healthcare.	Duke University	Marilyn M. Lombardi & Bob Barnes		T.B.D.	5-7 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/healthcareinnovation">https://www.coursera.org/course/healthcareinnovation</a>	Coursera
Global health/ epidemics / TB	Global Tuberculosis (TB) Clinical Management and Research	Health Care Workers and Health Professions Students can prepare to plan and deliver TB care in their communities by applying the latest clinical and research data presented in this nine-week course focusing on TB/HIV Co-Infection.	Johns Hopkins University	Jason Farley & Richard E. Chaisson		T.B.D.	2-4 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/tbmanagement">https://www.coursera.org/course/tbmanagement</a>	Coursera

Health / elderly/ Alzheimer's disease	Care of Elders with Alzheimer's Disease and other Major Neurocognitive Disorders	Health professionals and students, family caregivers, friends of patients, and others interested in learning about dementia and quality care will acquire in this five-week course foundational knowledge in the care of persons with Alzheimer's Disease and other neurocognitive disorders.	Johns Hopkins University	Nancy Hodgson & Laura Gitlin	5 weeks	T.B.D.	3-5 hours of work / week	English with English subtitles	Verified certificate	<a href="https://www.coursera.org/course/dementiacare">https://www.coursera.org/course/dementiacare</a>	Coursera
Health/ Training / CHW	Training and Learning Programs for Volunteer Community Health Workers	Learn how to organize and deliver training and learning programs for volunteer community health workers.	Johns Hopkins University	William Brieger	7 weeks	T.B.D.	5-7 hours of work / week	English with English subtitles		<a href="https://www.coursera.org/course/commhealthworkers">https://www.coursera.org/course/commhealthworkers</a>	Coursera
Health / Alcoholism	Alcohol and its Effects on Health	Alcohol is enjoyed by many people during social occasions, but for others addiction to alcohol or alcohol-related illnesses can be a serious health issue. This free online course begins by reviewing the biological effects of alcohol on the body				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Health / Health care	Caring in the Health Professions	Learn how to manage an organization successfully. Care relationships within health professions are of great importance and hold a lot of meaning for both the provider and recipient. This free online course will give you a comprehensive understanding and knowledge of care relationships.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Health / Children / Youth	Fundamentals of Childhood and Youth Studies	Improve your knowledge of child and youth development. This free online course was developed in response to the emerging importance of children and youth in international development policy. The course will give the learner a comprehensive understanding and knowledge of development from the early years.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com

Health / Virology	Fundamentals of Virology	A virus is a small infectious particle which can only replicate inside the cells of a living organism. Most viruses are harmless to humans, some are infectious, some are highly infectious. Learn more about viruses and their effect on human health.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Global health/ epidemics / Hepatitis B	Global Health Initiative - Hepatitis B Awareness	In this course important aspects of the hepatitis B are covered in detail				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Global health/ epidemics / Hepatitis C	Global Health Initiative - Hepatitis C Awareness	In this course important aspects of the Hepatitis C are covered in detail.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Global health / chronic diseases / hypertension	Global Health Initiative - Hypertension Awareness	Learn more about hypertension and its effects on health.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Global health/ epidemics / malaria	Global Health Initiative - Malaria Awareness	Learn more malaria and its effects on health. In this course important aspects of the Malaria are covered in detail.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Global health / chronic diseases / COPD	Global Health Initiative: Chronic Obstructive Pulmonary Disease Awareness	Learn more chronic obstructive pulmonary disease. In this second course important aspects of the disease COPD.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Global health / chronic diseases / COPD	Global Health Initiative: Chronic Obstructive Pulmonary Disease Awareness - ITALIAN	Learn more about chronic obstructive pulmonary disease.				Any time	N.A.	Italian		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Global health / chronic diseases/ diabetes	Global Health Initiative: Diabetes Awareness	Learn more about diabetes.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com

Global health / chronic diseases/ diabetes	Global Health Initiative: Diabetes Awareness - ITALIAN	Learn more about diabetes.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Global health / Infectious diseases	Health Guidelines for Avoiding Infectious Diseases	Learn more about the techniques and practices that help avoid infectious diseases. Every year millions of people in the developing world fall ill or die from infectious diseases due to lack of awareness of basic health guidelines and practices.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Global health/ epidemics / HIV / AIDS	HIV/AIDS - Awareness and Prevention	This online course - Living with HIV and AIDS - uses a straightforward style to deliver a clear and effective basic AIDS Awareness education program.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Health / nutrition	Human Health - Diet and Nutrition	This course aims to offer a broad education on how to stay health in today's hectic, fast-paced world. The course discusses life expectancy, healthcare, and individual's dietary needs.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Global health	Human Health - Global Health Issues	Understand the importance of global health, women's health, AIDS and HIV. Human Health 3 course examines the global health issues affecting the world today with a particular focus on the developing world. The interactive course considers a variety of topics such as, Women's Health, HIV/AIDS.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Global health	Human Health - Health and Human Development	This free online course continues our exploration of health and issues of human development. This section covers human development, global health, HIV and AIDS, and family and human resources. This free interactive course is ideal for students wishing to improve their understanding of human development.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com

Health / Common medical conditions	Introduction to Common Medical Conditions	Learn more about common medical conditions that affect millions of people around the world. Advances in medicine are occurring all the time and medical and scientific research continues to reveal both how the human body functions normally and what happens during a diseased state.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Health / Immunology	Introduction to Immunology	Immunology is the study of the immune system. This free online course explains how the human immune system fights disease and infection. This course is taught through a series of narrated videos.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Health / Human Systems	Introduction to the Cardiovascular System	The human cardiovascular system is made up of the heart, blood vessels and blood supply. These act as one system to supply vital oxygen, nutrients, and hormones to tissues and remove carbon dioxide and metabolic waste products. Learn more about the structure and function of the cardiovascular system.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Health / Human Systems	Introduction to the Human Digestive System	The human body cannot generate energy itself and so must obtain it from external sources. Learn more about the human digestive system.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Health / Human Systems	Introduction to the Human Muscular System	The human muscular system plays a vital role in maintaining posture and is essential for movement of the body. This free online course enables the learner to explore the structure and functions of the human muscular system.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com

Health / Human Systems	Introduction to the Human Nervous System	This free online anatomy course will be of great interest to healthcare professionals who would like to obtain a greater knowledge and understanding of the human nervous system, and to anyone who would like to know more about the structure and functioning of the central and peripheral nervous system.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Health / Human Systems	Introduction to the Human Reproductive System	Unlike most anatomical systems in the human body the reproductive systems in the male and female are completely different in structure and function but both work together to play a vital role in the production of an offspring. Learn more about the human reproductive system.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Health / Human Systems	Introduction to the Human Respiratory System	The respiratory system plays a vital role in the inhalation and exhalation of respiratory gases in the human body. It allows for the inhalation of gases such as oxygen in the air which can then be transported by the blood around the body. Learn more about the human respiratory system.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Health / Human Systems	Introduction to the Human Sensory Organs	Human sensory organs such as the eye, ear, nose and tongue are central in the processing of sensory information from all the stimuli that bombards the body continuously. Learn more about the human sensory organs.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Health / Human Systems	Introduction to the Human Skeletal System	The human skeleton is an amazing and complex structure and is involved in vital functions such as supporting the bodily organs, providing points of attachment for the musculature system to allow movement, maintaining body shape, and protecting vital organs. Learn more about the human skeletal system.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com

Health/ Water treatment	Managing Water Resources for Human Health	Planet Earth is known as the blue planet due to the large amount of water present on its surface. However, less than one percent of total water is available to humans as usable freshwater. Learn about the importance of water, the distribution network, and the control of water resources.				Any time	N.A.	English		<a href="http://alison.com/subjects/13/Health-Literacy">http://alison.com/subjects/13/Health-Literacy</a>	Alison.com
Global health / Chronic diseases	Modern Lifestyle Diseases: Awareness and Prevention	Around the world, diabetes, obesity and cardiovascular diseases are affecting the health and well-being of hundreds of millions of people. These diseases are no longer confined to the developed world as millions of people in developing countries are suffering them too.
