

A VirtualNurse™ for Women's Health Worldwide

TAVIE[®], the clinically validated mobile VirtualNurse™ to support and empower women towards self-management of their condition and treatment. TAVIE[®] will be adapted for local and cultural relevance in every country.

Zero Mothers Die Zero Mothers Die

Pregnant women in developing countries continue to face abnormally high mortality according to WHO, with 800+ deaths per day. TAVIE-Women will join the Zero Mothers Die initiative to support women during pregnancy by helping them better manage their HIV treatment.

ONE WOMAN ONE MOBILE

Sponsor one mobile for one woman and contribute to their empowerment and autonomy, leading to safer pregnancies. ZMD phones are equipped with airtime, loaded with the VirtualNurse™ and more to become their daily best friend!

A VirtualNurse™ for Women's Health: HIV

Although women living with HIV share many of the same health issues as HIV-positive men, they are likely to face greater challenges related to caring for their families, finding access to treatment, and dealing with social stigma. In addition, they may face female specific health issues related to gynecological care and family planning.

The objectives of TAVIE-WOMEN is to:

- ✓ Improve support available to women living with HIV.
- ✓ Help them develop the skills needed to meet the challenges inherent to their health condition.
- ✓ Help them understand how to live as a woman with HIV.
- ✓ Help them cope with side effects and difficult situations.
- ✓ Improve their interactions with healthcare professionals.
